The meeting was called to order at 1:40 pm. Minutes of the previous meeting were approved by a motion by Aaron and seconded by Miff.

David Anderson-ODEQ reported on the Umatilla Chemical Depot lagoon treatment system-a pump, treat, re-inject system. The majority of the leftover munitions are located on the state or National Guard side. There are 140 monitoring wells across the project.

Phil Hamm-OSU Discussion concerning Port of Morrow hosting our website. The URL will be LUBGWMA.ORG if available. Documents will be standard PDF. Miff will possibly have a draft of the website at the next meeting.

ACTION PLAN: We need a more focused action plan that is shorter to be able to move on and get more work done. We need to include more involvement of OHA and OWRD and more input. There needs to be more projects that can be funded. There is no requirement to get items completed, but projects to try and make sense.

DEQ will look into the peer review process.

The next meeting will be August 23 at 1:30 at HAREC-Phil will reserve a room.

The meeting adjourned at 3:31.
